I am a Jr. Full-stack developer who comes from a background working in architecture and design for 3 years, where I learned many skills that helped me a lot when entering the technology world. I am creative and passionate about web design, having started by learning on my own, and then consolidated my knowledge in a programming bootcamp. I continuously seek growth and new opportunities that bring new experiences where I can apply my skills and continue learning new technologies.

PROJECTS / EXPERIENCE

GetThatHome

A made with React Js framework desktop app website, where you can find the house of your dreams, and also you can sale or rent your properties.

Eatable App

An React Js app moblie first as an demo for a delivery food app. After you are logged in or signed up you cant select your food, set up an adress and finally make the order.

Keepable App

An app developed fully in Javascript that helps keep notes properly organized and where they can be edited, deleted or given a color, among other options.

TweetableApp

A simple clone version of Twitter, made with the rails framework (MVC), which allows users to sign up and post tweets and comments through localStorage.

OTHER EXPERIENCE

Metapolis Consultores Arquitectos

Design, Planning and Engineering
Junior Architect

Lima, Peru
2019 – 2020

Collaborated as part of the design and engineering team, where I improved my design skills in terms of understanding and offering creative solutions to the requirements of each project. Also developed organizational skills, improved efficiency, applied logical processes and interdisciplinary teamwork in each project.
